Subject:	LOWER DIVISION CLERK

Section : **Language Proficiency Test**

Comprehension:

Read the following passage and answer the questions given below.

Teenagers created the Mosquito ringtone so that they could be alerted to incoming text messages or calls on their cell phones without nearby adults becoming aware of it. These "secret ringtones" take advantage of the fact that as people age, they lose some of their hearing sensitivity, especially in the higher frequencies. So a high-frequency tone that is at the edge of audibility for most teenagers will be inaudible to many adults over age 20, and to most adults over the age of 30.

The tones are not, strictly speaking, ultrasonic, because they can be heard by normal, healthy young people, but they are sometimes called "ultrasonic" ringtones because they are above the frequency range of hearing for most adults. Teen Buzz ultrasonic ringtones may range from 10 to 20 kilohertz (kHz); 14.4 kHz is one frequency commonly used as a "silent" ringtone.

The idea for the Teen Buzz ultrasonic ringtones was inspired by the Mosquito Device, an invention designed to disperse loitering teens by emitting a high-frequency tone (17.4 kHz) that most teens can hear but most adults cannot. The Mosquito Tone is not only high frequency but is specially modulated to be annoying.

SubQuestion No : 1

Q.1 The Mosquito Device was designed to:

✗ 1. Drive away people from gatherings

✗ 2. Test ear sensitivity

✔ 3. Shoo away loitering teenagers

✗ 4. Annoy adults

Comprehension:

Read the following passage and answer the questions given below.

Teenagers created the Mosquito ringtone so that they could be alerted to incoming text messages or calls on their cell phones without nearby adults becoming aware of it. These "secret ringtones" take advantage of the fact that as people age, they lose some of their hearing sensitivity, especially in the higher frequencies. So a high-frequency tone that is at the edge of audibility for most teenagers will be inaudible to many adults over age 20, and to most adults over the age of 30.

The tones are not, strictly speaking, ultrasonic, because they can be heard by normal, healthy young people, but they are sometimes called "ultrasonic" ringtones because they are above the frequency range of hearing for most adults. Teen Buzz ultrasonic ringtones may range from 10 to 20 kilohertz (kHz); 14.4 kHz is one frequency commonly used as a "silent" ringtone.

The idea for the Teen Buzz ultrasonic ringtones was inspired by the Mosquito Device, an invention designed to disperse loitering teens by emitting a high-frequency tone (17.4 kHz) that most teens can hear but most adults cannot. The Mosquito Tone is not only high frequency but is specially modulated to be annoying.

SubQuestion No : 2

Q.2 Why did teenagers create the Mosquito ringtone?

Ans

✗ 1. So that they can annoy adults

✔ 2.
So that adults are not aware of their incoming text messages

✗ 3. So that incoming text messages are not heard by healthy people

✗ 4. So that mosquitoes don't attack them
